

Dear,

Every year an estimated 26.9 million people of all ages have been diagnosed with diabetes (8.2 percent of the U.S. population). Data also shows that there are about 79,000 people who die from diabetes each year. A lot of the complications and deaths are due to poor control of their blood sugars that leads to blindness, kidney failure, heart attacks, strokes and lower limb amputation. Our organization, Diabetic Social is raising the awareness of diabetes across TN by teaching individuals how to manage this disease and reduce the number of deaths caused by diabetes complications.

Diabetic Social is a non-profit 501c3 organization and our mission is to create international awareness and education around the diabetic lifestyle through proper management and prevention. We provide a platform for individuals living with diabetes where they can come together to share their experiences and obtain valuable information.

To further our efforts, we'd like to invite you to become a corporate sponsor at the platinum level of \$1,000. This will help us purchase supplies and put together informative pamphlets needed to participate in health fairs and other related events. To show our appreciation of your sponsorship, we will include your company name and logo on our Diabetic Social website, sponsorship banner and social media platforms.

You can also make donations on our website at www.diabeticsocial.org or PayPal at www.paypal.me/diabeticsocial. For more information, feel free to contact us anytime at the information listed below. We hope that we can count on you to support our mission to make an impact on our diabetic community through awareness and education.

Thank you.

Chaka Jackson
